

Intelligent Tunable White LED Driver (Constant Current)

- The housing is made from V0 flame retardant PC materials from SAMSUNG/COVESTRO.
- Ultra-small, thin and light screwless end cap.
- Change the output current, fade time and other parameters on the NFC programmer or via the App, and sync the parameters to the driver.
- Set the output current down to 1mA.
- With soft-on and fade-in dimming function, enhancing your visual comfort.
- T-PWM™ Super depth dimming technology, dimming depth can reach 0.0001% Flicker Free
- \bullet The whole dimming process is flicker-free with high frequency exemption level. IEEE 1789
- Comply with the EU's ErP Directive, networked standby<0.5W.
- When there is no load, the output will be 0V to prevent damage to LEDs due to poor contact.
- $\bullet\,$ Overheat, over voltage, overload, short circuit protection and
- automatic recovery
- Suitable for Class I / II / III indoor light fixtures.
- Normal service life can reach 100,000 hours.
- 5-year warranty (Rubycon capacitor)

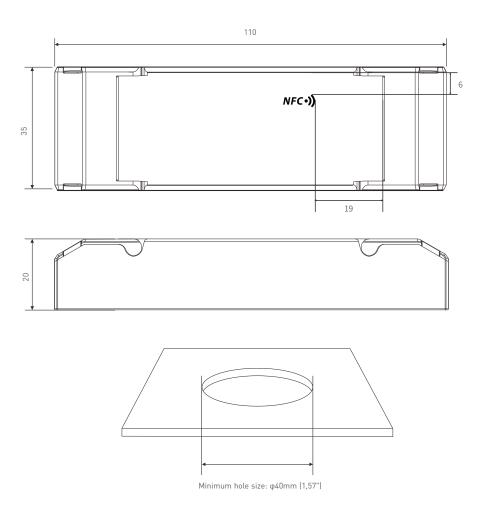

Technical Specs

Model			100-500-W2M				
	Output Type		it current				
Features	Dimming Interface	DMX512	P/RDM				
	Output Feature	Isolation	١				
	Protection Grade	IP20					
	Insulation Grade	Class II (Suitable for class I/ II / III light fixtures)					
	Output Voltage	9-42Vdc					
оитрит	Maximum output voltage	<48Vdc					
	Output Current Range	100-500mA					
	Output Power Range	0.9W-12W					
	Dimming Range	0~100%, down to 0.01%					
	LF Current Ripple	<3%[Maximum current for non dimming state]					
	Current Accuracy	±5%					
	PWM Frequency	≼3600Hz					
	DC Voltage Range	120-250Vdc					
	AC Voltage Range	100-240Vac					
	Input Voltage	115Vac/230Vac					
	Frequency						
	Input Current	50/60Hz					
	Power Factor						
INPUT	THD	PF>0.95/115Vac (at full load), PF>0.9C/230Vac (at full load) THD<10%/230Vac, at full load					
IMEQI	Efficiency (Typ.)			500m A(at full load)			
		84%@300mA(at full load), 82%@500mA(at full load)					
	Inrush Current	Cold start 15A(Test twidth=102us tested under 50% peak)/230Vac					
	Anti Surge	L-N: 2K					
	Leakage Current	Max. 0.					
	Working Temperature		~ 50°C tc: 80°C				
	Working Humidity	20 ~ 95%RH, non-condensing					
ENVIRONMENT	Storage Temperature/Humidity						
	Temperature Coefficient		/°C(0-50°C)				
	Vibration	10-500Hz, 2G 12min/1cycle, 72 min for X, Y and Z axes respectively					
	Overload Protection	Automatically protect the device when the load exceeds 102% of the rated power. Automatically recover once load is reduced					
PROTECTION	Overheat Protection	Intelligently adjust or turn off the current output if the PCB temperature ≥110°C.					
1 NOTECTION	Overvoltage Protection	Automatically protect the device when voltage exceeds the no-load voltage. It can be recovered automatically					
	Short Circuit Protection	Enter h	iccup mode if short circu	it occurs, and recover automatically			
	Withstand Voltage	I/P-0/P: 3750Vac					
	Insulation Resistance	I/P-0/F	I/P-0/P: 100MΩ/500VDC/25°C/70%RH

Product Size

Unit: mm

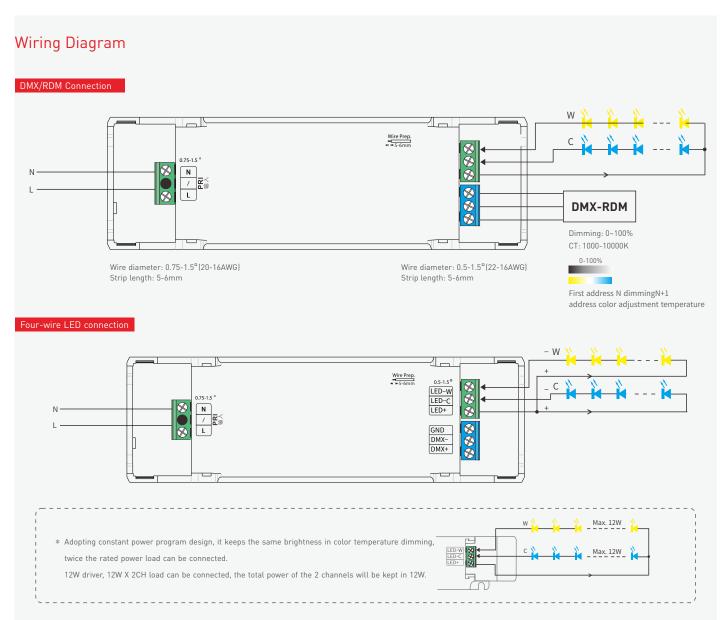

Table of Typical Corresponding Parameters for Current

The typical 9 current data sets below are for reference when selecting LED fixture models. More current levels can be set by NFC using mobile APP with 100-500mA adjustable in 1mA step									
Output Current	100mA	150mA	200mA	250mA	300mA				
Output Voltage	9-42Vdc	9-42Vdc	9-42Vdc	9-42Vdc	9-40Vdc				
Output Power	0.9-4.2W	1.35-6.3W	1.8-8.4W	2.25-10.5W	2.7-12W				
Output Current	350mA	400mA	450mA	500mA	/				
Output Voltage	9-34Vdc	9-30Vdc	9-27Vdc	9-24Vdc	/				
Output Power	3.15-11.9W	3.6-12W	4.05-12.15W	4.5-12W	/				

Protective Housing Application Diagram

1. Use a tool to pry up the protective housing on the side panel.

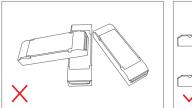

2. Pry up the protective housing in the side plate position with a tool.

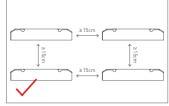

Connect to electrical wires with a screwdriver as wiring diagram shows.

4. Press down the tension plate to fix the the electrical wires.

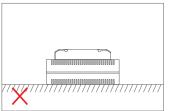

5. Close the protective housing.

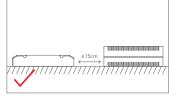

Installation Precautions

Please not place the products on power supplies. The distance between the product and the power supplies should be \geqslant 15cm so as not to affect heat dissipation or shorten the lifetime of the products.

Note: The temperature within the installation area should be within the working temperature range of the products. Please do not install products inside LED fixtures to avoid temperature exceeding the working temperature that may affect the product lifetime.

Use the NFC Lighting APP

Scan the QR code below with your mobile phone and follow the prompts to complete the APP installation (According to performance requirements, you need to use a NFC-capable Android phone, or an iphone 8 and later that are compatible with iOS 13 or higher).

 $\textcolor{red}{\bigstar} \hspace{0.1cm} \textbf{Before you begin setting the parameters of the driver, please make sure \hspace{0.1cm} \textbf{the driver is powered off.}$

Read/Write the LED driver

Use your NFC-capable phone to read LED driver data, then edit the parameters and they can be directly written to the driver.

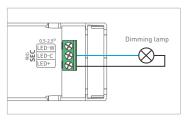

1. Read the LED driver

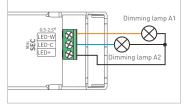

On the APP home page, click [Read/Write LED driver] , then keep the programmer's sensing area close to the NFC logo of the driver to read the driver parameters.

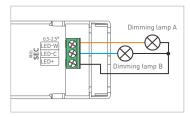

2. Switch the dimming interface

On the page of "Edit parameters", click [Dimming interfaces] to switch to the needed dimming interface: CT, DIM(1 address for 1 channel / 1 address for 2 channels / 2 addresses for 2 channels).

1 address for 1 channel

1 address for 2 channels

2 addresses for 2 channels

3. Edit the parameters

Click 【Parameter settings】 to edit the advanced parameters, like output current, DMX address, brightness range, power-on fading time, etc.

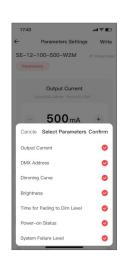

4. Write to the driver

After completing the parameter settings, click [Write] in the upper right corner, and keep the programmer's sensing area close to the NFC logo of the driver, so the parameters can be written to the driver.

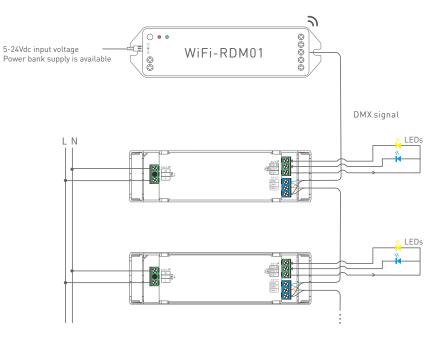

Use with RDM Editor

 $\label{thm:complex} The\,\mathsf{DMX}\,driver\,\mathsf{can}\,\mathsf{work}\,\mathsf{with}\,\mathsf{the}\,\mathsf{address}\,\mathsf{editor}\,\mathsf{that}\,\mathsf{complies}\,\mathsf{with}\,\mathsf{standard}\,\mathsf{RDM}\,\mathsf{protocol}.$

It is recommended to use LTECH's RDM editor (model WiFi-RDM01), which can achieve more functions such as remote browsing and parameter setting. Wiring diagram as below:

* the defaulted DMX address of the driver is 1.

LTECH RDM editor App interface instruction

Download the App, setting the parameters after well connecting the RDM editor, please check the manual of WiFi-RDM01 for more details.

Test

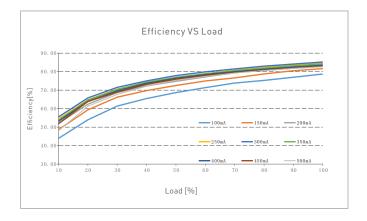

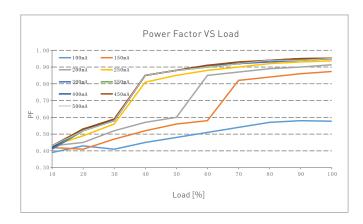

- a: Click "Add", edited the address in corresponding box.
- b: Click "ID", get more product details.
- c: Click " $\ensuremath{\textcircled{\textcircled{\scriptsize 0}}}$ ", enter setting interface.
- d: Click "No.", issue the recognizing command.

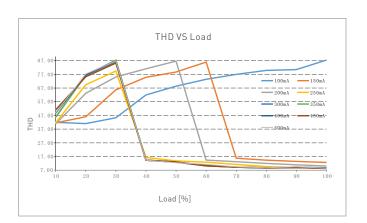

DMX address setting

Transportation and Storage

1. Transportation

Products can be shipped via vehicles, boats and planes.

During transportation, products should be protected from rain and sun. Please avoid severe shock and vibration during the loading and unloading process.

2. Storage

The storage conditions should comply with the Class I Environmental Standards. The products that have been stored for more than six months are recommended to be re-inspected and can be used only after they have been qualified.

Attentions

- This product must be installed and adjusted by a qualified professional.
- LTECH products are and not lightningproof non-waterproof (special models excepted). Please avoid the sun and rain. When installed outdoors, please ensure they are mounted in a water proof enclosure or in an area equipped with lightning protection devices.
- $\bullet \quad \mathsf{Good} \ \mathsf{heat} \ \mathsf{dissipation} \ \mathsf{will} \ \mathsf{extend} \ \mathsf{the} \ \mathsf{life} \ \mathsf{the} \ \mathsf{product}. \ \mathsf{Please} \ \mathsf{install} \ \mathsf{the} \ \mathsf{product} \ \mathsf{in} \ \mathsf{a} \ \mathsf{environment} \ \mathsf{with} \ \mathsf{good} \ \mathsf{ventilation}.$
- · When you install this product, please avoid being near a large area of metal objects or stacking them to prevent signal interference.
- Please keep the product away from a intense magnetic field, a high pressure area or a place where lightning is easy to occur.
- Please check whether the working voltage used complies with the parameter requirements of the product.
- Before you power on the product, please make sure all the wiring is correct in case of incorrect connection that may cause a short circuit and damage the components, or trigger a accident
- If a fault occurs, please do not attempt to fix the product by yourself. If you have any question, please contact the supplier.
- * This manual is subject to changes without further notice. Product functions depend on the goods. Please feel free to contact our official distributors if you have any question.

Warranty Agreement

- · Warranty periods from the date of delivery: 2 years.
- $\bullet \quad \text{Free repair or replacement services for quality problems are provided within warranty periods}.$

Warranty exclusions below:

- Beyond warranty periods.
- Any artificial damage caused by high voltage, overload, or improper operations.
- Products with severe physical damage.
- Damage caused by natural disasters and force majeure.
- Warranty labels and barcodes have been damaged.
- No any contract signed by LTECH.
- 1. Repair or replacement provided is the only remedy for customers. LTECH is not liable for any incidental or consequential damage unless it is within the law.
- $2.\,\mathsf{LTECH}\ \mathsf{has}\ \mathsf{the}\ \mathsf{right}\ \mathsf{to}\ \mathsf{amend}\ \mathsf{or}\ \mathsf{adjust}\ \mathsf{the}\ \mathsf{terms}\ \mathsf{of}\ \mathsf{this}\ \mathsf{warranty}, \ \mathsf{and}\ \mathsf{release}\ \mathsf{in}\ \mathsf{written}\ \mathsf{form}\ \mathsf{shall}\ \mathsf{prevail}.$
